May 2022

## *Be Safe, Be Adventurous, and Be Happy*

WRITTEN BY COUNCILOR CHRIS CONDIE

Kids are almost out of school! Summer is almost here! Vacations are about to begin!

As temperatures rise, we will also get ready to begin watering our lawns and landscapes. Lehi is fortunate that we have two watering systems. One for Pressure Irrigation (PI) and one for Culinary (drinking). The PI water is

meant for outside watering, and culinary is for indoors.

We, as residents, have been asked to not begin watering our lawns until May 1. If cooler temperatures linger into May, then I would encourage us to hold off, if we can, on watering our lawns further into May as we can. Trees, shrubs, and flowers are good to receive a drink of water sooner, but only if they need it. This will help us to store water longer for later into the watering season.

Last year Lehi residents and businesses conserved 1 BILLION gallons of water. Let's see if we can top that this year. I watered my lawn less last year, and it was greener and longer than in years past. It was fantastic! As I drove around our beautiful city I noticed green lawns and healthy vegetation everywhere.

We can conserve water, use smart watering techniques, use

less fertilizers and still have great landscapes.

I look forward to a great summer, and the opportunity to walk through our beautiful community. If you have any questions, please do not hesitate to reach out to the Lehi City Water Department at 385.201.1000. They know water and they are more than willing to help!

Be safe, Be adventurous, and Be Happy.

- Chris Condie

# Water Department

Per City ordinance, there is no outside watering before April 15. With that said, we ask that residents wait to water their lawn until May 1. Waiting a little longer to use the water can make a big difference later in the heat of the summer.

Lehi City Council has also decided to implement phase 3 of the Water Shortage Management Plan once irrigation usage is underway. Under these restrictions, water users may not water their yards more than two days a week with at least two days in between watering cycles.

One irrigation is equivalent to 20 minutes with pop-up spray heads and 40 minutes with impact rotor sprinklers. With the current restrictions in place, we understand that there will be spots in lawns where there may be browning. We would encourage residents to spot water those areas rather than run a whole irrigation zone or running your system longer.

# Literacy Center
